Photosynthesis Research **30**: 145–146, 1991.

Contents Volume 30 1991

Volume 30 No. 1 1991

Obituary 1

Regular papers

Lebedev, N.N., Krasnovsky, Jr., A.A. and Litvin, F.F.: Phosphorescence of protochlorophyll(ide) and chlorophyll(ide) in etiolated and greening bean leaves: Assignment of spectral bands 7

Yurina, N.P., Karakashev, G.V., Karapetyan, N.V. and Odintsova, M.S.: Composition and biosynthesis of thylakoid membrane polypeptides in the red alga *Cyanidium caldarium*: Comparison with the thylakoid polypeptide composition of higher plants and cyanobacteria 15

Reinero, A. and Tobin, E.M.: An amino-proximal hydrophobic domain in the major light-harvesting chlorophyll *a/b*-protein is essential for membrane integration and protein stability 25

Olson, J.M. and Cox, R.P.: Monomers, dimers, and tetramers of 4-*n*-propyl-5-ethyl farnesyl bacteriochlorophyll *c* in dichloromethane and carbon tetrachloride 35

Olson, J.M.: 4-Isobutyl homologs of farnesyl bacteriochlorophyll *c* in carbon tetrachloride 45

Historical corner

Gest, H.: The legacy of Hans Molisch (1856-1937), photosynthesis savant 49

Corrigendum: Volume **29**: 133–147 61

Announcement 63

Volume 30 Nos. 2–3 1991

Obituary 65

Regular papers

Widger, W.R.: The cloning and sequencing of *Synechococcus* sp. PCC 7002 *pet*CA operon: Implications for the cytochrome *c*-553 binding domain of cytochrome *f* 71

Nedbal, L., Gibas, C. and Whitmarsh, J.: Light saturation curves show competence of the water splitting complex in inactive Photosystem II reaction centers 85

Liu, B.-L., Hoff, A.J., Gu, L.-Q., Li, L.-B. and Zhou, P.-Z.: The relationship between the structure of plastoquinone derivatives and their biological activity in Photosystem II of spinach chloroplasts 95

Malyan, A.N. and Vitseva, O.I.: Catalytic properties of β subunit isolated from chloroplast coupling factor 1 107

Giersch, C. and Krause, G.H.: A simple model relating photoinhibitory fluorescence quenching in chloroplasts to a population of altered Photosystem II reaction centers 115

Rashid, A., Bernier, M., Pazdernick, L. and Carpentier, R.: Interaction of Zn^{2+} with the donor side of Photosystem II 123

Veeranjaneyulu, K., Charland, M., Charlebois, D. and Leblanc, R.M.: Photosynthetic energy storage of Photosystems I and II in the spectral range of photosynthetically active radiation in intact sugar maple leaves 131

Technical communication

Ferguson, L., Halloran, E., Hawthornthwaite, A.M., Cogdell, R., Kerfeld, C., Peter, G.F. and Thornber, J.P.: The use of non-denaturing Deriphat-polyacrylamide gel electrophoresis to fractionate pigment-protein complexes of purple bacteria 139
